

## Learning Curve Group – Northern Powerhouse – Northern Skills Network

Some key features Learning Curve Group have helped to served colleges and FE sector and many others including our learners with regards to returning, following the pandemic

We held a webinar for college's, and we had them doing activities which showcased our toolkits for study programmes which can be took from classroom based to online and how they can be adapted easily for learning.

Some key features:

- These are predominately to support 16-18 students on study programmes but could also be used for adult learners and apprenticeships
- They have been developed in partnership with NCFE
- They cover the full qualification and include all resources, activities and assessments
- They are designed to be used in the classroom alongside normal teaching activity however they can be used to support flexible blended learning to address reduced teaching hours due to sickness, further lockdowns, shielding, having to self-isolate etc.
- Resources can be bought on a licence and will be available in hard copy, as editable PDF's or available to use as online learning

We have also helped to support businesses across various industries by putting a redundancy package together which will be a host of courses and advice and guidance for them to be able to help with their future.

How we are helping people fill our online enrolment

Educate whilst you isolate – campaign we started as lockdown happened to get people doing online learning whilst they may have had time to do something to help them upskill
